

PoD

Portable Dilution

The Citron PoD System automatically mixes concentrated chemicals with water to dispense diluted chemical into spray bottles or mop buckets. It has 2 dilution options (High & Low) allowing precise dispensing of chemicals every time!

Prevent wasteful pouring of chemical concentrates

Safety First

Tamper-proof caps make units safer to handle, protecting workers and environment from coming into direct contact with chemical concentrates at every stage of the process.

Easy to Use

Quick disconnect allows for better mobility from one area to the next with two different dilution rates so that workers can find the perfect dilution for the job.

Cost Savings

Saves money as accurate chemical dispensing avoids spillage and dilution misuse. Using concentrates reduces packaging and shipping costs.

ECOLOGO Certified

Certified for reduced environmental impact, ECOLOGO Certifications indicate a product has undergone rigorous scientific testing, exhaustive auditing, or both, to prove its compliance with stringent, third-party, environmental performance standards.

Image	Name	Yield	Description
