

AromAire™

Breathe Easy

Your Solution for Large Area Odour Control Needs

Malodours are Unavoidable

AromAire™ effectively combats malodours through its unique blend of chemistry and new innovative dispensing system.

Where Can It Be Used?

Indoors where there are odour creating elements, such as waste-holding areas, compactor rooms, storage areas and anywhere there may be unwanted odours.

How Does It Work?

Fragrance oils are introduced into the targeted environment in a "smoke-like" mist, effectively combating malodours. Unlike traditional systems, that produce a wet and heavy spray, these light weight fragrance molecules are suspended in the air, covering the entire space.

AromAire™
Odour Control System

Product Overview

Targets Malodours

- Fragrance oils are diffused into targeted area, eliminating the odour molecules
- Unlike traditional systems, AromAire™ diffuses into the air as vapour, covering the entire space and preventing any damage to walls' paint

Consistent Air Quality

AromAire™ can be used for ambiance enhancement at any large public gathering area or in challenging indoor areas such as waste-holding facilities, compactor rooms, recycling areas, gym facilities and more.
